

Technology Discovery – Tech I

Our world is constantly filled with new technology from every area of the globe. Most people don't know about these new technologies. Your task is to uncover these new technologies and spread the idea of these new inventions to our class and the world.

Task: Research a new and exciting technology that was unknown to you. Present your finding using a new technology from the web.

Procedure: Use the internet and various sources to find new and exciting technologies to share with the class. When you are done, compile your information and present with you (or your partner) to the class. You must use a new web technology to present (no powerpoint). You may use animoto, prezzi, pixton, empressr, imageloop, mypick, presentit, sliderocket, myjugaad.in, vuvox.com/collage, xtranormal.com, or any other you get approved.

Presentation: Use your Web 2.0 tools to present an informative presentation to the class highlighting your technology. Include the following:

- Technology
- Costs/benefits
- Why will it have an impact?
- Pictures, graphs, video, sound, drawings, CAD designs, etc.

(25 points each for a total of 100/100 points)

Examples:

[Lasers to fight Malaria??](#)

[New prosthetic arm – Terminator?](#)

[Gecko learning – new dry adhesive](#)
